

06.26.2023 - RELEASE REPORT

PIMSY Plan	PIMSY Department	PIMSY Screen	PIMSY Platform	Type	Release Notes
Professional Platinum	Billing & Invoicing	System Settings	Desktop	Enhancement	We have added a new setting (-786) that will allow you to control how note addendums are handled for Invoicing and Payroll. If the claims associated with an addendum have already been invoiced, the system will create a new claim and update its remarks that there is a new invoice created due to an addendum. If the invoice associated with that addendum has NOT been invoiced, then the system will make the appropriate adjustments to the current invoice. This will also impact how payroll is run.
Professional Platinum	Billing & Invoicing	Payroll	Desktop	Enhancement	We will be adding a new section to the Payroll Feature in PIMSY. The system will be able to account for adjustments to payrolls that occur when addendums are made to notes after they have been paid. When addendums are created on a note that the user has already been paid for, the system will track the adjustments in the background, then pull those adjustments into the next payroll for that staff member. *This addition will be implemented within the next couple of weeks.
Professional Platinum	Messaging	Message History	Desktop	Enhancement	We have added all messaging types to the Message History screen. This provides a place to view all messages that are being sent out. We have also added a new column to the Messaging History tab called <i>UsageCount</i> . This will allow sites to see how many messages they are being charged for, especially when text messages run longer than 160 characters.
